IRELAND AND THE SPANISH EMPIRE, 1600-1815

Óscar Recio Morales

In the wake of the Irish-Spanish defeat at Kinsale (1601), Irishmen and women from all levels of the society migrated to

Spain, where the imposition of orthodox Catholicism within the Spanish realms implied the social inclusion of certain 'nations' such as the Irish. This book covers this complexity of Irish migration to the Spanish empire, from 17th-century Hapsburg Spain to 18th-century Bourbon Spain, from Europe to the new World. Even though Ireland did not form part of this empire, the contribution of Irishmen and Irishwomen to this multinational empire was remarkable. The Irish 'nation' played a key role in the army, commerce, medicine, literary life and 18th-century Spanish Enlightenment.

IRELAND AND SPAIN IN THE REIGN OF PHILIP II

Enrique García Hernán

A new and welcome contribution to Irish-Spanish historical studies, this book treats of the close historical ties that have existed

between both countries, which were forged and reached their zenith in the tumultuous times of 16th and early 17th century Europe. Originally written in Spanish and published under the title *Irlanda y el Rey Prudente* (2 vols, Madrid, 2000 and 2003), this revised synopsized and updated work, impeccably translated by Liam Liddy, offers a lavish portrait of the political, military and religious relations between both countries which, in their desire to rid the world of their common enemy, England, went to untold lengths to achieve this objective and, in the process, came within a whisker of changing the course of history.

400pp; hbk. ISBN: 9778-1-84682-166-0 Retail: €65.00

IRISH INFLUENCE AT THE COURT OF SPAIN IN THE SEVENTEENTH CENTURY

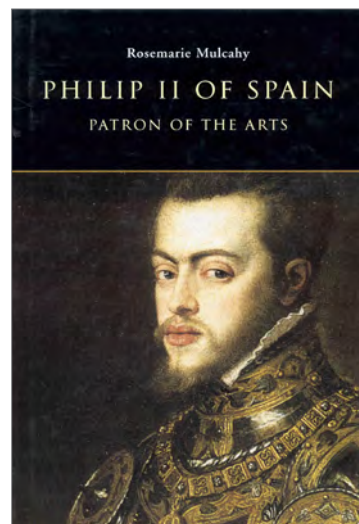

Igor Pérez Tostado

‘This book is a reminder of how important mainland Europe was to Ireland and how it was a destination for

emigrants and exiles before the great famine turned our orientation towards America and elsewhere. Tostado points out that not only élites emigrated but that the sizable Irish community in Spain consisted also of priests, merchants, soldiers and whole families. Spain was the preferred choice not just because it was the most powerful country in Europe but also because it was the self-appointed protector of Catholicism against the forces of the Reformation ... Tostado’s is a well written and thoroughly researched work that adds a lot to our understanding of this period of Irish history.’

PHILIP II OF SPAIN *Patron of the arts*

**Rosemarie
Mulcahy**

The image of Philip II (1527-98) as stern and assiduous defender of his political inheritance and of the Catholic faith is tempered and enriched by his image as patron and collector of art.

During the 42 years of his reign (1556-98) he transformed the arts in Spain, then largely provincial, into the international and modern. His patronage attracted artists and craftsmen to enter the royal service, among them Titian, Anthonis Mor, El Greco, Federico Zuccaro, Pompeo, Leoni and Alonso Sanchez Coello. This book gives a sense of the variety of talent, both Spanish and foreign, that flourished under Philip II’s patronage and provides fascinating insights into the king’s artistic projects. The topics covered include: the function of the religious art, court portraiture, art and diplomacy and artists’ working methods.

IRISH COMMUNITIES IN EARLY MODERN EUROPE

**Thomas O’Connor
& Mary Ann Lyons,
EDITORS**

‘Scholars of early-modern Europe should be thankful for the painstaking archival research which provides

the backbone for the twenty two essays that constitute this publication, and which allows many hitherto obscure figures in the history of Ireland to emerge from the shadows. Besides the vast chronological and geographical scope of the book, another outstanding feature is its thematic range ... [T]he level of the scholarship sets a standard to which current and future scholars of early-modern migration and emigration will aspire’, David Worthington, *The English Historical Review*

IRISH MIGRANTS IN EUROPE AFTER KINSALE, 1602-1820

**Thomas O’Connor
& Mary Ann Lyons,
EDITORS**

Despite the Irish defeat at the Battle of Kinsale (1601), Ireland remained strategically important for other European

powers, especially Spain and, later, France. Therefore, when political, social and religious changes at home caused many Irish to migrate, temporarily or permanently, they headed for Habsburg and Bourbon territories. This collection explores the motivation for migration in the early 17th century. Essays chronicle migrants’ integration into European networks of influence and indicate the role of the European influence in modernizing the migrant communities and the country that produced them.
